With respect to letter dated 03.01.2022 by CPIO Mr. A Kolanjivel, responding to my RTI application for ***“process/endeavour undertaken to give hearing to trading persons to comply with office memorandum dated 02.07.2021. “***. The CPIO in correspondence informed me ***to visit MSME DI, Chennai and to collect the information.***

Which is really shocking and saddened as the information should have been provided in online mode itself by which application was made. Further attention is drawn to section 7(9) of The Right to Information Act, 2005 which says “information shall ordinarily be provided in the form in which it is sought unless it would disproportionately divert the resources of the public authority or would be detrimental to the safety or preservation of the record in question”. Plain reading of section 7(9) makes it clear that information needs to be given in form in which it is sought for and unless any specific mentioning is not made in application it needs to be in the same form of application made for .i.e. Physical or Online depending upon the application type.

Further, I would like to draw attention of your good office that in current, unpleasant situation due to wide spread of COVID-19 (Omicron) where the government has requested to avoid public gathering and honourable Madras High Court via notification R.O.C.NO.23991-C/2020/C3, dated 02.01.2022 has implemented Video Hearing to curb the widespread of the deceases. I have been asked to visit the office risking myself and people around me; it is worth here to mention here that even I was tested positive of COVID-19 on 6th January, 2022.

Sir,

With reference to your email regarding Material for Lok Sabha Provisionally admitted version of Starred Diary No.3576 due for answer on 10.02.2022 on "Footwear Industry", we are herewith providing the point wise reply as under.

a & b) For India, the trade impact of coronavirus is said to be around 348million dollars. The list of top 15 most- affected economies due to the COVID-19 outbreak includes India too. If we look at the footwear industry in the country, the major brands have shut down their stores, and some of them have also delayed their new collection release. All this has come in the part as the public health officials have encouraged social distancing and the limiting of non-essential interaction in large groups while COVID-19 cases and death tolls rise.

Being the epicentre of the virus, China is also a major supplier of raw materials and components. The shutting of factories and production in China has wreaked havoc in the supply chain, leading to a sharp increase in the prices of various items. Due to this shutdown, the leather shoe market in India is facing the challenge. Agra, the city which is known to be the largest footwear hub in India, has been affected drastically. Leather shoes worth over Rs.3,000 crore are exported to European countries from Agra every year. The city is the largest footwear hub in India, and the industry is adversely impacted as manufacturers import several components such as laces, shoe lining, buckles, ornaments, insoles, outsoles, cellulose board, shank board, foam and packing material from China. But due to this outbreak supply from China has dried up, it has affected manufacturing here. Apart from this, other Indian footwear brands have also hit hard due to a decrease in sales, both offline and online.

c) There is an increase in GST for the footwear from 5% to 12% which will be effect from January 2022, at present 5% GST is charge on the sale value of up to Rs. 1000/- per pair.

The rate changes will provide clarity to the Industry and settled once for all. The issue caused by the inverted duties structure (for eg. Raw material tax rate will be high when compare to finished goods tax rate. For differential tax the company wants to apply for refund in the department).

Contd..

For example, the supply value is below Rs.1000/- per pair GST @ 5% would be applicable and if supply value is above Rs.1000/- per pair GST @ 12%. In order to correct inverted duty structure in footwear, the fitment committee has proposed increasing the rate on footwear having the sale value less than Rs.1000/- to 12% from 5%. Therefore the Government has decided to hike the footwear tax rate from 5% to 12% as per fitment committee.

- d) This Institute is focusing on short term decisions about the pandemic and gratifying that to follow the science (i.e data and evidence).This pandemic has brought changes in many people's work, roles and social relationwith significant implications for mental health and well being. The GST from 5% to 12% will provide clarity to the Industry.
